## CREEK MASTA & CREEK MASTA HS - V NOSE

The CREEK MASTA is a v-nose model that is an extension from our standard nomad, taking this model to the next level. This models as the name suggests would be a good little boat for sleeking around the creeks and estuaries, with the part cast platform this gives a stable platform for flicking a lure, throwing a cast net or setting the crab pot. A minnkota plate on the front deck allows the use of an electric outboard and the part floor makes moving around a breeze. Take a look at the features and specifications of this model as it is sure to please.
