SEA JAY

ALUMINIUM BOATS

discover new horizons

NEW IMAGE TRANSCOM

The New Image Transom is only available on specific 5.35m & 5.65m models. Designed as an integral part of the hull, this gives the boat excellent buoyancy, providing maximum cockpit area and easy access to the engine. Suitable for both 2 and 4 stroke engines.

These models include a 4mm bottom reverse chine and welded strakes giving maximum strength & performance.

WHEN BUYING A BOAT

If you have been involved in boating for many years you will be familiar with the aspects of boating, however if this is your first boat we would like to assist you with some boating key points. Your authorised Sea Jay Dealer will be able to suggest the model you require by considering the following aspects.

The model you require will depend on your type of boating activity and the conditions of the waterways in your area. Models can vary in performance so you would need to consider the waterways you will use most frequently. From our lakes and rivers to offshore the various boat models available enable you to make this decision.

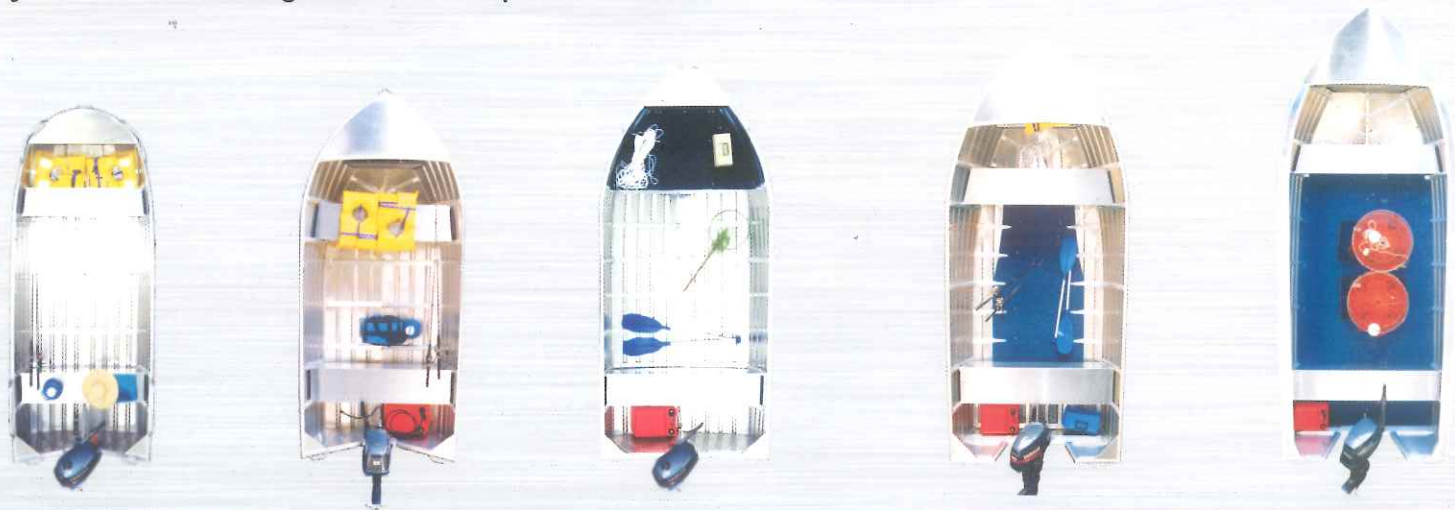

Your engine requirements will also play an important part in your boat model choice. You will need to consider the size and type of engine that fit your requirements. The boat model specifications show the recommended and maximum hp and motor weight applicable. The boat hull performance can be spoilt by an incorrectly fitted or trimmed engine. Therefore if you are new to boating and had little experience with

outboard engines, your dealer will guide you with the correct engine transom position and explain about motor trimming if your engine has this option.

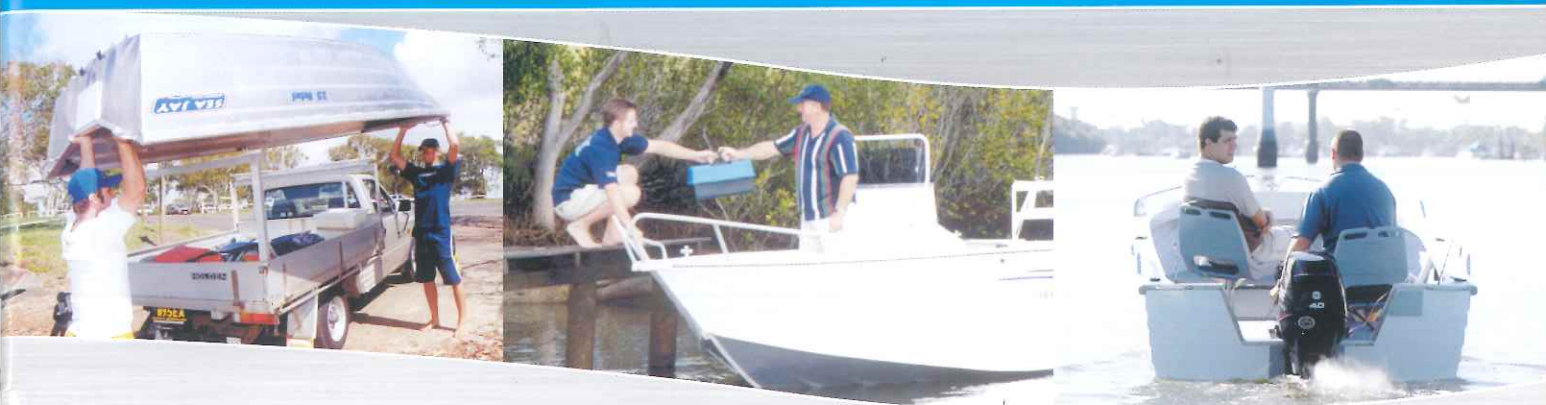

The loading of your boat hull is important when wanting the best ride. If you intend to carry a big load, the model size and engine hp need to be a factor, together with the position the load is carried in the boat. If these factors are considered your boat will move "on to the plane" with ease.

An incorrect trailer set up can damage your craft, so it is important when deciding on a trailer, to consider the distance you will be travelling, the launching variations and the type of road surface you will use. As with your boat, trailer options can vary so there is a trailer model to suit your needs.

Learn all there is to know about boating safety through your Transport Department Safety Hand Book and play safe on our waterways.

ULTIMATE EDGE TRANSOM WITH REVERSE CHINE

OUR RANGE

The "Sea Jay" range features high sides and wide beams which provide excellent performance, stability and safety for the boat owner. Our company prides itself on meeting our customer's individual needs by producing a wide range of models, together with various optional accessories and fittings available.

The Sea Jay Range comprises of Open Standard Dinghies, V-Nose Punts, Console, Runabouts and Cabins. Also available in the Open Dinghy and V-Nose Punt range, are specific models with their own individual features. The Sea Jay models range in lengths from 2.45m for small open models to 5.65m for Console, Runabouts and Cabin models. Sea Jay also build vessels to survey requirements by following strict guidelines and testings, these models are required by government departments and private commercial operators.

The specially designed Sea Jay "Ultimate Edge" model features a new style transom with a Reverse Chine. The Reverse Chine has been a feature in our larger models for some time and now due to our ongoing development we have included this feature in our smaller models.

The "Ultimate Edge" design provides stability at rest and with a deeper V hull gives a softer ride and top performance. This design is specifically available in hull lengths 4.55m to 5.0m as shown in the brochure.

INTRODUCING WHO WE ARE

Sea Jay Aluminium Boats is a family company owned by us Col and Janelle Glass, established in our home town of Bundaberg in 1989.

Having been involved in boating from a young age as recreational fishermen, water skiers and boat racing, boating has certainly played a major part in our lives, hence our involvement in the boating industry.

With the premises covering 9,300m² and with 2,280m² under cover this provides easy movement for products and supplies.

OUR COMMITMENT

We bring our product to you with our personal pride and trust you will enjoy many memorable moments on some of the best waterways our country offers.

What a better way to relax by "GETTING AMONGST IT" in a Quality "Sea Jay" Aluminium Boat you can rely on and trust.

SEA JAY QUALITY & WORKMANSHIP

Particular attention is given to each and every "Sea Jay" model produced with quality and pride of workmanship being an important aspect of the manufacturing procedure.

Our factory staff comprises of qualified tradesmen and trades assistants. We have a training program in place where our apprentices and trainees receive qualified training by recognised training organisations who provide on the job training that targets all areas required in the field of boat building.

A quality checking system is in place to check material and product at each stage throughout the manufacturing process. Every attempt is made to provide a quality product to enter the market place. We guide our employees to build our product with the pride of workmanship they would expect in a boat of their own. This motto is carried through the entire manufacturing process.

- Wide side decks are fully welded
- Top quality paint finish by highly qualified automotive painter – as much paint below the floor as above
- Unpainted boat floors sprayed with a clear metal sealer
- Top quality Australian plywood used
- Resin coated plywood used on carpeted flooring
- Individually hand fitted flooring
- Through on going hull development, whether a 2 or 4 stroke engine our design will enhance the performance of your outboard.
- 3mm and 4mm material bottoms are stitched welded internally on the keel and chine for extra strength
- Ongoing research and development

WANDERER - ULTIMATE EDGE

Explore New Horizons with the "Wanderer" whether it be cruising the waterways or casting a line, this model will be popular with boating families. The bunk cushions are standard with this model, however they may be removed and a mid section added to form a carpeted platform for fishing. A rear lounge is fitted standard to provide adequate seating for all the family or may be folded away to provide a spacious cockpit. This Bowrider style model is available in three models lengths and will provide you with many hours of fun in the sun.

VENTURE CABIN - ULTIMATE EDGE

Looking for a spacious cabin and room to move? Our Venture Cab model is the one to choose.

An ideal family cab, this hull will provide you with hours of boating fun and with a high cab, will provide you with shelter from the elements. With bunk cushions to give full cabin comfort and a folding rear lounge to provide you with that additional seating or folded away to give more space, this range of cuddy cabins should meet your needs.

The 5.0m Venture Cab is well suited for inshore conditions. This "Ultimate Edge" model with a new style transom and reverse chine bottom provides stability and all round performance.

Our 5.35m & 5.65m Venture Cabs are regarded as a true offshore hull. With a 4mm plate bottom and reverse chine, this hull rides and performs extremely well. Your ride is second to none as you head to your favourite patch of reef.

WARRANTY

C & J Glass Holdings Pty Ltd A.C.N. 106 576 229

This document states terms of the Warranty given by the Company in respect of products manufactured by it.

1. Interpretation

In this document:-

- 1.1 "The Company" means C & J Glass Holdings Pty Ltd A.C.N. 106 576 229
- 1.2 "The Customer" means the Buyer of any boat manufactured by the Company.
- 1.3 "Boat" means any aluminium boat or accessory which is manufactured by the Company.
- 1.4 "Warranty Period" means the period of two years from the date of delivery to the original customer.

2. Warranty

2.1 The Company warrants to the Customer that:-

- 2.1.1 The quality of the materials used in the construction of the boat are in accordance with, or above, the standard usual in the aluminium boat building industry; and
- 2.1.2 The boat will remain free of defects during the warranty period.

3. Works under Warranty

3.1 To obtain the benefit of the warranty the Customer should return the boat to the place of purchase.

4. Exclusions

4.1 The warranty will not cover any defect or damage caused by:-

- 4.1.1 Alterations to the boat or its operation outside design limitations;
- 4.1.2 Misuse, abuse or negligence; or
- 4.1.3 Use of a motor which has more power than is recommended on the specification plate attached to the Boat.
- 4.2 Paint is not warranted against the effects of oxidization or damage caused by fuel and dissimilar metals.

5. Commercial Use

- 5.1 Due to the variance in usage and conditions which may be experienced in commercial applications a Customer intending to purchase the Boat for a commercial purpose must satisfy himself/herself that the Boat is suitable for the intended purpose.
- 5.2 This Warranty does not cover any boat which has been used for a commercial purpose.

6. Exclusion of Further Warranties

- 6.1 Except as stated in this document no warranty, express or implied, is given by the Company except any warranty which is implied by law.

GENERAL MAINTENANCE

It is important to follow a few basic rules in providing regular maintenance to your new vessel.

- 1. Always thoroughly wash your entire vessel with fresh water and mild detergent after use.
- 2. A spray of a protective lanolin based product should be re-applied after washing, to all areas where dissimilar metals are fitted. eg. Any Stainless Steel fittings (Windscreen Bolts, Rod Holders, Baitboard etc.)
- 3. If an accessory is fitted after market (not factory fitted) it is important to spray a protective lanolin based product to these areas where salt or moisture can be attracted.
- 4. Leave your vessel permanently tilted to drain after use.
- 5. Floatation material can be affected by petrol. Check periodically.
